TRACK 3/4 ESP COURSES
GUIDELINE

WHAT IS ENGLISH FOR SPECIFIC PURPOSES?

- > English for Specific Purposes (ESP) is an approach to language teaching that focuses on developing English language skills in a specific context, profession, or field of study. Unlike general English language courses that cover a broad range of topics and skills, ESP tailors language instruction to meet the specific needs of learners in their particular professional or academic domain.
- > ESP programs are designed to help learners acquire the language skills necessary for effective communication within their specific area of expertise. The content and materials used in ESP courses are often directly related to the field in which the learners are involved. This can include specialized vocabulary, industry-specific communication skills, and relevant discourse patterns.
- > ESP courses are typically goal-oriented and learner-centered, with an emphasis on practical language use in real-world situations. This approach recognizes that learners have specific language needs based on their professional or academic goals and seeks to address those needs directly.

ESP courses at IMU Language School

The significance of ESP courses in preparing students for their respective academic areas is emphasized by Istanbul Medipol University Language School. Therefore, Track 3 and Track 4 will provide asynchronous ESP courses, which will follow a predetermined schedule and include online homework. The ESP courses will account for 10% of the overall scoring in each track. Students will not be able to receive a grade if tasks are not completed on time. The courses will be conducted through Microsoft Teams classes.

How will you access the ESP Platform?

The system will automatically send your user info information to your Medipol email address before the courses start in Track 3. Please check your spam box as well if you have not received the email.
