Academic Advisor

Each student club must work under the supervision of an academic advisor. Each academic advisor can advise a maximum of 3 student clubs. The advisor attends the club's meetings and activities as often as possible, providing constructive and developmental suggestions to ensure the effective functioning of the club. They assist students in defining the club's objectives and goals, planning its programs, directing students' time, talents, and energies effectively, and maximizing benefits. The advisor approves and takes responsibility for club activities. They should prevent the club from being dominated by one person or group and ensure the implementation of democratic procedures in decision-making.
